Arizona ranks among the top five states in the nation in total solar-powered generating capacity from both utility- and small-scale installations, with more than 6,100 megawatts. Per capita energy consumption in Arizona is less than almost four-fifths of the states.

It's no surprise that solar conversions in Arizona are generally worth the investment, but many homeowners see the average installation price of \$34,615 -- or \$24,231 after the 30% federal tax credit -- and wonder how it could be worth the upfront fees. Moreover, many people will wonder if their home specifically will benefit from solar conversion.

6 days ago Leeward Renewable Energy (LRE) has announced the completion and commencement of commercial operations at its White Wing Ranch solar project in Yuma County, Arizona, US. The 179MW project is a significant addition to LRE's portfolio, now exceeding 3.3GW of operating capacity. Located on 1,400 acres of private land, White Wing Ranch is poised ...

There's never been a better time to go solar in Arizona. As the country's sunniest state, Arizona's major cities see an average of 82% sunshine each year. State residents are also eligible to receive various incentives, not to mention the incredible savings potential in ...

Overview of solar power in the U.S. state of Arizona. Insolation on developable areas of the SW United States. Solar power in Arizona has the potential to, according to then-Governor Janet Napolitano, make Arizona "the Persian Gulf of solar energy". In 2012, Arizona had 1,106 MW of photovoltaic (PV) solar power systems, and 6 MW of concentrated ...
