

Will South America lead the recovery of offshore projects?

Energy research firm Rystad said that it expects activity on the continent to lead the recovery of offshore projects, citing lower breakeven prices and competitive payback times compared to projects in other parts of the world as making South America's offshore projects more resilient.

Does South America's offshore oil industry continue to grow?

In the midst of a pandemic and a price crash however, South America's offshore oil industry has continued to grow.

Is offshore wind a viable option for marine energy research in Colombia?

Marine energy research, especially offshore wind, is rapidly growing in Colombia. Over the past 15 years, several scientific documents have been published. Most of them addressed the offshore wind potential at regional [87,88,89] and national-local scales [24,32,90,91,92,93,94].

Does Brazil have a strong offshore energy sector?

It notes that Brazil has extensive experience in oil and gas exploration and extraction, especially in deep and ultra-deep waters. It implies the existence of adequate infrastructure and laboratories, specialized human resources and experts that can contribute to Brazil's offshore renewable sector's development.

Where are offshore wind resources found in Brazil?

In the South region, significant offshore wind resources can be observed along the coastline of the Rio Grande do Sul (RS) and south of Santa Catarina (SC) states, as shown by [22]. The states of Rio de Janeiro (RJ) and Espírito Santo (ES) are two states with significant potential in the southeast region.

What is offshore oil & gas & onshore wind concession in Brazil?

In Brazil, offshore oil and gas and onshore wind concession and permitting process are based on the tender regime. The regulatory agency offers specific sites where the energy can be extracted.

It currently has nine 200,000-cbm storage tanks in operation. Kogas, the world's second-largest corporate LNG importer, said it operates in total 71 LNG storage tanks in South Korea and overseas. The company imports approximately 96 percent of Korea's LNG demand via its four LNG terminals, namely Incheon, Pyeongtaek, Tongyeong, and Samcheok.

Australia-headquartered integrated energy company Venice Energy is holding formal talks with multiple potential partners with ties to the United States (U.S.) and Asia to secure the future of a proposed LNG import terminal project in South Australia, which is said to be the world's first floating LNG import terminal which will run on 100% renewable energy.

Which countries are driving South America's offshore oil boom? ... Helping these endeavours is Suriname's favourable regulatory framework for energy companies, with a royalty rate lower than many other countries in South America. ... and the country dominates global deployment of upcoming floating production storage and offloading units ...

CBO will operate the PSV with its owner, Delta Logistics, which has experience in providing offshore support in the Caribbean and South America. With the latest addition, the company's fleet will comprise 45 vessels: 23 PSVs, 13 anchor handling tug supply vessels (AHTS), 6 ROV support vessels (RSVs), and 3 oil spill response vessels (OSRVs).

Sargeant Marine, an asphalt shipping company based in Boca Raton, Florida, pleaded guilty to bribery schemes in three South American countries and agreed to pay a criminal fine of \$16.6 million to resolve the charges.

The company's Noble Discoverer semi-submersible rig has won a contract with Petrobras International Braspetro B.V. - Sucursal Colombia, a subsidiary of Brazil's Petrobras, for the provision of drilling services offshore Colombia.

South Korean shipping company Pan Ocean has wrapped up the acquisition of a minority stake in Export Grain Terminal (EGT), one of the largest export grain terminals on the US West Coast. ... Pan Ocean America bought the 36.25 per cent stake from Japanese trading company Itochu, Pan Ocean confirmed to Offshore Energy in an emailed statement.

Our Latin America Energy Outlook 2023 - the first IEA outlook for the region - contains in-depth country and regional analysis of energy and climate trends, identifying opportunities and key ...

Seanamic Group company Flexlife, has secured a contract from a "leading" South American operator for the scanning of flexible risers.. Flexlife. The contract, in partnership with Houston based ROV major Oceaneering, covers the scanning of all deepwater, uninsulated flexible pipelines.. It is part of a larger integrity management program to determine if flooding ...

Analysis from GlobalData predicts that South America's offshore production will surpass North America's by 2024 - so which countries are set to benefit from booming offshore ...

Norway-based energy storage company Corvus Energy has received a contract to provide a battery energy storage system onboard Magellan Discoverer, the first hybrid diesel-electric vessel to be constructed in South ...

Quest Offshore, the organizer of the inaugural OTC Brasil, Floating Wind Solutions, as well as many other

energy related events, is organizing the 2nd annual FWS South America Offshore Wind 2024 in support of current ...

South America has long had Hydro power as its primary renewable energy source. That could change with solar and Offshore wind ... boasting a technical offshore wind energy potential of more than 1200GW. According to a study published by the World Bank, it could install up to 96 GW of generation capacity by 2050 with an offshore wind strategy ...

Westwood in December outlined that 2022 will have the highest floating production system (FPS) throughput capacity sanctioned since 2010, despite major project delays caused by multiple factors, including the supply chain inflationary pressure, which remains a concern in the future as well.. The energy market research and consultancy firm revealed that ...

Oceaneering International's Remotely Operated Survey (ROS) group has completed an Integrated Rig Services campaign for an operator offshore South America. ROS recorded a milestone 150,000 hours of operations with 99% uptime with no client operations or vessel downtime.

ExxonMobil has executed the largest offshore carbon dioxide (CO2) storage lease in the U.S. with the Texas General Land Office (GLO). The over 271,000-acre site complements the onshore CO2 storage portfolio ExxonMobil is developing, and further solidifies the U.S. Gulf Coast as a carbon capture and storage (CCS) leader.

South America. Oct. 2, 2011. ... Petrobras has agreed a 15-year charter with Excelerate Energy for VT3, a floating storage and regasification unit to be built by DSM in South Korea. The vessel, which will also be deployable as an LNG carrier, will be able to store around 173,400 cu m (6.2 MMcf) of gas, and will operate eventually at the ...

Foreign energy companies are taking initial steps to develop a large number of offshore wind farms along the coasts of Brazil and Colombia. South America. Home > Brazil > Energy and Natural Resources > Oil, Gas ... they are increasingly turning to new sources of energy. Offshore wind is a technology that historically has mostly been utilized by ...

Development of better energy storage technologies helps mitigate the intermittent nature of wind power. Offshore wind farms potential in South America. Offshore wind farms provide an opportunity for renewable energy development in South America. The wind farms are taller and larger than onshore ones which results in higher energy production.

The report covers the South America Offshore Energy Market historical market size for years: 2020, 2021, 2022 and 2023. The report also forecasts the South America Offshore Energy ...

Latin America Energy Outlook 2023 - Analysis and key findings. ... highlighting the need for dispatchable capacity and storage to maintain electricity security. ... output in Brazil increased by close to 40% since 2010 and production recently started in Guyana after a surge of offshore discoveries. Including those, the region holds about 15% of ...

Swiber Holdings has completed a multi-million dollar platform and subsea pipeline installation project in South America. The project, awarded in September 2013, by an oil and gas company in South America, was for the jacket and topside installation of a wellhead platform and its 24" and 4" pipelines of 70 kilometres each. According to the [...]

According to the offshore shipping company, the contract will commence during the second quarter of 2022. CSV Normand Samson (Source: Solstad Offshore) In the company-related news, in August, Solstad secured a contract with Petrobras for the deployment of the CSV Normand Flower on the Brazilian continental shelf.

Hyundai Heavy Industries (HHI), the world's biggest shipbuilder, said that it has developed an independent liquefied natural gas storage tank model, Lobe-Bundle Tank. Hyundai Heavy's newly-developed LNG storage tank won Approval in Principle from the Japanese classification society Nippon Kaiji Kyokai (NK) in June 2012. While the storage tank is designed ...

Twelve companies have expressed interest in building Bangladesh's first onshore liquefied natural gas (LNG) import terminal. Bangladesh, illustration; Image courtesy of Pixabay The LNG project in Bangladesh is on a 20-year build-own-operate basis.

Located within Block-6 in the Gulf of Guayaquil, Ecuador, South America, and 55 kilometres from Puerto Bolívar, the Amistad natural gas field was discovered in 1970 by ADA company with the drilling of the Amistad-1 well, which began production in 2002, under the operation of EDC company.

This section provides an assessment of COVID-19 impact on Energy Storage Systems Market demand in the region. Energy Storage Systems Market Size and Demand Forecast The report provides South America Energy Storage Systems Market size and demand forecast until 2027, including year-on-year (YoY) growth rates and CAGR.
