

# The great energy storage depression

Was the Great Depression a global economic crisis?

The Great Depression was an international economic crisis of epic proportions. For the leading countries for which we have reasonable data on GDP, Figure 9.1 shows that the world average level of GDP fell by about 10% between 1929 and 1932. Around this average, there was a wide range of experience.

Why was the Great Depression so deep?

The Depression was so deep due to a multitude of factors, including a lack of credibility and cooperation, the trade war, uncertainty, debt deflation, and sticky wages. The Depression was prolonged as nations dithered on how to achieve stability and economic recovery. Especially hard hit were the countries that maintained the gold standard.

How did the Hoover Dam impact the Great Depression?

The Hoover Dam project set the precedent for more giant water and power projects during the 1930s, which was important for the Great Depression. It provided water to Los Angeles through a 260-mile long aqueduct, and the hydroelectric power went to Los Angeles and Southern Arizona.

What happened to the US economy during the Great Depression?

Wide variation around this average existed, with the United States experiencing a 25% decline in GDP and Great Britain seeing a decline of 5%. Commodity prices fell at a dramatic pace, international trade collapsed, capital flows dried up, unemployment skyrocketed, and investment crashed.

How did economic integration affect the Great Depression?

Nearly every country was affected by the Great Depression to some degree. No economic crisis before, or since, had been so widely transmitted, so deep, and so long. Economic integration was the conduit for this transmission.

Which dams were built during the Great Depression?

During the Great Depression, some of the largest dams in the world were constructed. These include Hoover Dam, a carryover from the President Herbert Hoover (served 1929-1933) administration, and Grand Coulee Dam in northern Washington State, which was one of Roosevelt's favorite water and power projects.

The Great Depression may have struck the heart of the United States, but it had a huge impact on several other countries around the globe. Countries including Canada, the United Kingdom, Australia, Chile, South Africa, Greece, Brazil, Poland, New Zealand, and Italy faced an unprecedented economic decline.

Between 2009 and 2015 suicide rates in the U.S. jumped to 30 people per 100,000! Yes, higher than the great depression. This is a huge tell in regard to the condition of this nation. Lack of food. As I mentioned a lack of jobs and food was the defining factor in this spike in suicides during the great depression.

# The great energy storage depression

"The Great Depression was a time when Americans had food front and foremost in their minds and were worrying about it every day," Coe said in an NPR interview promoting the release of his book.. For the first time, the federal government took steps to feed its citizens, and new terms like "food scientist," "home economist," and "dietary recommendations" entered our vocabularies ...

Families suffered. Marriage rates fell. The contraction began in the United States and spread around the globe. The Depression was the longest and deepest downturn in the history of the United States and the modern industrial economy. The Great Depression began in August 1929, when the economic expansion of the Roaring Twenties came to an end.
