

Trane tracer sc backup 24vac power supply

+ Ensure that 24 Vac power supplies are consistently grounded. If grounds are not maintained, intermittent or failed communication could result. + Connect the shield portion of the ...

View and Download Trane Tracer MP581 installation instructions online. Frame-mounted. ... 21-27 Vac (24 Vac nominal), 50-60 Hz 76 VA. Altitude: 6,500 ft (2,000 m) Installation: Category 3. ... o 24 Vac dedicated power supply. o Compliance with ...

5. Place the PM014 module to the right of the Tracer SC module. 6. Place the UC400 module on the bottom DIN rail. 7. Connect the 4-wire cable harness to the IMC connector on the Tracer SC and PM014. 8. Connect the transformer power supply cable in the 24VAC terminal block. 9. Connect the 6-position power cable harness to the UC400 24VAC ...

Wiring and Applying Power The Tracer™ SC+ controller can be powered in one of three ways: o 24 Vac @ 30 VA Class 2 connected to 4-position terminal block. o Tracer™; plug-in power ...

Tracer SC+ Installation Sheet: 1 BMTB Legacy Comm Bridge: 1 BTMB Terminator Board: 1: Table 2. Replacement parts ... + Neither 24 VAC, higher power-wire conduits, nor wire bundles must not ... Connect the transformer power supply cable in the 24VAC terminal block. 5. Connect the bridge board power cable to the Tracer SC+ 24VAC terminal

BAS-PRC087B-EN 7 BAS R"newal Program BAS R"newal(TM) is a Trane building control systems upgrade program that helps customers transition to the current Tracer SC+ system. The program makes it easier to upgrade existing installed Tracer systems and non-Trane systems to the latest technologies including web-access,

Follow best practices when implementing a backup and restore procedure plan for your system. To back up a Tracer SC: 1. From the left navigation menu, click tools > Backup and Restore. ...

Trane Tracer(TM) XM70 I/O expansion module (8UI, 6UI/AO, 4 relays, 1 press) MOD01923: X13651563-010 Trane ... 24 Vac, Class II power In addition to the points used for the VAV application, the spare inputs and outputs on the UC400 controller may be used for ancillary control and programmed using Tracer TU Tracer Graphical Programming 2 (TGP2). ... See device connected to DC supply for current draw. o Replace the control box

Trane tracer sc backup 24vac power supply

cover after field wiring ...

It should have 24 Vac. If it does not, measure the power input to XFMR 24 Vac input and of the UC210 controller. The supply voltage should be between 20.4 to 27.6 Vac (24 Vac cataloged). However, voltages at either extreme may result in system instability. Page 67: Appendix: Typical Trane Factory Wiring Diagrams

To ensure proper operation of the controller, install the power supply circuit in accordance with the following guidelines:

- o The controller must receive power from a dedicated power circuit. Failure to comply may cause control malfunctions.
- o A disconnect switch for the dedicated power circuit must be near the

Power needs to be wired to the binary output. All outputs are isolated from each other and from ground or power. Note: Ranges given are per contact. Other Ranges UC400-B: TRIAC 24 Vac Powered Binary output (BO4 to BO9)(a) 6 TRIAC

- o UC400: 0.5 A max @24-277 Vac, resistive and pilot duty
- o UC400-B: 24 Vac Powered Use for modulating TRIAC.

Refer to Figure 5 for wiring connection locations on the power supply module. Page 14: Grounding The Power Supply Module Transformer connection terminal. return wire 24 Vac transformer Important: Trane does not recommend connecting the ground wire to one leg of the 24 VAC transformer output at the transformer lead.

Tracer SC system controller 143.6/5.6 8 Tracer UC400 controller 143.6/5.6 8 Tracer UC600 controller 215.5/8.50 12 Tracer UC800 controller 71.6/2.8 4 Tracer XM30 expansion module 53.6/2.1 3 Tracer XM32 expansion module 71.6/2.8 4 Tracer XM70 expansion module 215.5/8.50 12 PM014 power supply module 107.6/4.2 6 Tracer BACnet terminator 35.6/1.4 2

The Tracer XM32 Expansion Module provides additional points when needed for Tracer UC600, Tracer UC400, and Tracer UC210 applications. Each expansion module has a total of four (4) relay outputs. A PM014 24Vac/24Vdc power supply module (Order Number X136515380) is required for applications that require more than two expansion modules.

View and Download Trane Tracer UC400 installation, operation and maintenance manual online. ... **Wiring Instructions** Power Supply Read the following Warnings, Cautions, and Notices before proceeding. ... (X39641064-01).
