

What is UN-Energy?

UN-Energy is the principal mechanism within the UN system for inter-agency collaboration on energy. UNDP's Energy Community of Practice brings together experts from across the works to share energy knowledge and insights. Upcoming events from the UNDP Sustainable Energy Hub. The latest news and stories from UNDP's Sustainable Energy Hub.

Can universal energy access be achieved without compromising climate objectives?

Worldwide, about 1.1 billion people had no access to electricity in 2016 and up to a billion more have access only to unreliable electricity networks (IEA, 2017a), with the biggest challenges in Africa. However, with the right balance of policies, universal energy access can be achieved without compromising global climate objectives.

What is the UN Energy Roadmap?

The roadmap calls for the UN system to significantly scale up its efforts towards attaining SDG 7 and net zero emissions, and for strengthening UN-Energy, which will coordinate and monitor progress on the Energy Compacts and implementation of the roadmap through the 2030 target year.

How many people need universal electricity access?

That's about one in ten people worldwide. Energy Access | United Nations Development Programme It's estimated that between US\$35 billion and 40 billion are needed annually to reach universal electricity access between 2021 and 2030 to reach universal access to electricity.

How can UN-Energy help achieve SDG 7?

UN-Energy, as the principal collaborative mechanism within the United Nations system for energy, is instrumental in strengthening policy alignment and coherence To advance progress towards SDG 7, it is crucial to invest in transformative partnerships that engage all stakeholders and foster trust. UN-Energy takes a leading role

What is the guiding principle of UN-Energy?

The guiding principle for UN-Energy is Sustainable Development Goal 7- access to affordable, reliable, sustainable, and modern energy for all by 2030. Through policy advice, knowledge sharing, and joint programming UN-Energy plays an active role in supporting member states to achieve their energy targets.

New York, 3 November 2021 - As pressure mounts for urgent climate action, UN Secretary-General António Guterres today issued a global roadmap to achieve a radical transformation of energy access and transition by 2030, while also contributing to net zero emissions by 2050.. The roadmap sets an aggressive timeline to ensure that 500 million more people gain access to ...

Stefan Schweinfest, Director, United Nations Statistics Division: "Sustainable Development Goal 7 has been a guiding star in the mobilization of efforts to provide affordable and clean energy to ...

UNECE's work on sustainable energy is designed to improve access to affordable and clean energy for all and help reduce greenhouse gas emissions and the carbon footprint of the energy sector in the region. It promotes international policy dialogue and cooperation among governments, energy industries and other stakeholders. The focus is on energy efficiency, ...

Call for submissions. The UN Secretary-General's Panel on Critical Energy Transition Minerals called for written submissions as an important way of sharing information, building understanding ...

Search the United Nations. Submit Search. ... Essential technologies such as battery storage systems allow energy from renewables, like solar and wind, to be stored and released when people ...

The United Nations have been working together with stakeholders in order to develop a more coordinated plan of action at global level to ensure progress on sustainable energy for all. The United Nations Decade of Sustainable Energy for All (2014-2024) represents a precious opportunity for all stakeholders to gather around a common platform to ...

UN Secretary-General issues new global roadmap to secure clean energy access for all by 2030 and net zero emissions by 2050. The roadmap sets an aggressive timeline to ensure that 500 million more people ...

Today at a United Nations energy summit, the United Nations as well as a group of international organizations and Governments announced a compact to help United Nations peacekeeping missions" transition to renewable energy. The initiative responds to the United Nations Secretariat's commitment to source 80 per cent of its power from renewable energy by ...

This energy-sector decarbonization can be achieved while simultaneously fulfilling the targets of SDG 7, including ensuring access to affordable, reliable, sustainable and modern energy for all...

Here, the United Nations Country Team in China works closely to assist the Government of China, in following the release of the new "1+N" climate policy. 40% of all new vehicles in China will be powered by new energy, and green travel will account for all 70% of trips in all cities over 1 million inhabitants in China by 2030.

The energy policy of the United States is determined by federal, state, and local entities. It addresses issues of energy production, distribution, consumption, and modes of use, such as building codes, mileage standards, and commuting policies. ... energy efficiency, and improved grid and grid storage installations with its defense ...

reach. This requires accelerating clean energy transition both from the demand and supply side, while such transformation should be orderly, just and equitable and also account for energy security. 7. To accelerate the energy transition, the COP 28 Presidency took a leading role in launching the Global Renewables and Energy Efficiency Pledge.

EERE is working to achieve U.S. energy independence and increase energy security by supporting and enabling the clean energy transition. The United States can achieve energy independence and security by using renewable power; improving the energy efficiency of buildings, vehicles, appliances, and electronics; increasing energy storage capacity; and ...

Energy Storage . An Overview of 10 R& D Pathways from the Long Duration Storage Shot Technology Strategy Assessments . August 2024 LDES deployments, the United States Department of Energy (DOE) established the . Long . Duration Storage Shot a in 2021 to achieve 90% cost reduction. b

Energy storage resources are becoming an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy sources. There are currently 23 states, plus the District of Columbia and Puerto Rico, that have 100% clean energy goals in place. Storage can play a significant role in achieving these goals ...

Within the UN system, the United Nations Secretariat is the largest contributor to climate change with approximately 60% of the total reported greenhouse gas (GHG) emissions, mainly from peace ...

Renewables on the rise For the 760 million people in the world who lack access to electricity, the introduction of modern clean energy solutions can enable vital services such as improved healthcare, better education, and internet access, thus creating new jobs, improving livelihoods, and reducing poverty. Driven by the global energy crisis and policy momentum, renewable ...

A key component of that is the development, deployment, and utilization of bi-directional electric energy storage. To that end, OE today announced several exciting developments including new funding opportunities for energy storage innovations and the upcoming dedication of a game-changing new energy storage research and testing facility.

Honduras commits to implement the Energy Efficiency Policy, an Expansion Plan Standards and Projects for Energy Efficiency by 2030. ... Association for Supporting the SDGs for the United Nations ...

The Panel's recommendations range from establishing a high-level expert advisory group housed within the United Nations to facilitate multistakeholder policy dialogue and coordination on economic issues in mineral value chains to a global traceability, transparency and accountability framework; to creating a fund to address legacy issues as a ...

Renewable energy is energy derived from natural sources that are replenished at a higher rate

than they are consumed. Sunlight and wind, for example, are such sources that are constantly ...

Less than two months ahead of the COP29 United Nations Climate Summit, the Azerbaijani leadership laid out its plans on Tuesday for what it hoped to achieve, as countries continue to wrestle with ...

To do so, we work with governments and partners to transform energy systems and support the integrated policy, technology and financial shifts that shape a country's sustainable economic development. ... UN-Energy. As the United Nations' mechanism for inter-agency collaboration in the field of energy, UN-Energy is a critical platform to help ...

POLICY BRIEF #15 INTERLINKAGES BETWEEN ENERGY AND CLIMATE CHANGE Developed by United Nations Framework Convention on Climate Change (UNFCCC), International Renewable Energy Agency (IRENA), The European Commission and UN Environment In collaboration with African Climate Policy Centre, UNECE, UNESCWA, Federal University of ...

A/68/309 - United Nations Decade of Sustainable Energy for All. A/69/323 - Promotion of new and renewable sources of energy ... **SDG 7 Policy Briefs 2018. ENERGY FOR SUSTAINABLE DEVELOPMENT** . In 2015, the UN General Assembly adopted the 2030 Agenda for Sustainable Development and its Sustainable Development Goals (SDGs), which include a ...

Learn more about SDG 7 Ensure access to affordable, reliable, sustainable and modern energy for all: Lack of access to energy supplies and transformation systems is a constraint to human and economic development. The environment provides a series of renewable and non-renewable energy sources i.e. solar, wind, hydropower, geothermal, biofuels, natural gas, coal, petroleum, ...

This energy governance policy paper serves as a strategic framework for UNDP teams and their partners to craft cohesive and impactful responses to foster a just energy transition. It intends to enhance comprehension and strengthen energy governance, contributing to global, regional, national, and local initiatives aimed at achieving more ...

His Five-point Energy Plan first calls for removing intellectual property barriers so that key renewable technologies, including energy storage, are treated as global public goods. ...
