Victron SmartSolar and Blue Solar MPPT charge controllers allow you to bring in a higher voltage from your solar array. It is critical to design your solar array to ensure that your input voltage is 5V above your battery voltage - at a minimum. ... Thankfully, the communication between Victron Energy solar charge controllers is very good, such ...

The Victron BlueSolar MPPT 75/15 is a compact solar charge controller designed for small-scale solar installations. It utilizes Maximum Power Point Tracking (MPPT) technology to maximize energy harvest from solar panels, supporting up to 75VDC input voltage and providing a maximum charging current of 15A. This controller is ideal for applications such as RVs, boats, ...
