What is a villagrid energy storage system?

The VillaGrid energy storage system is complementary to home solar panels which charge the battery. As homeowners face rising electricity rates, unplanned power outages and Public Safety Power Shutoffs, the VillaGrid can help them reduce their electric bills and better endure blackouts.

How does a villagrid Solar System work?

Your PV (Photovoltaic solar system) collects energy from the sun and stores it in your VillaGrid Storage System. Your system connects to an Inverter which converts the DC energy stored in your VillaGrid battery storage system and converts it to usable AC energy that your home appliances can use.

How much does a villagrid Solar System cost?

If you want to install the VillaGrid as part of a solar-plus-storage system, battery costs are just one part of the equation. A 5 kilowatt (kW) solar energy system costs anywhere from \$9,000 to \$15,000, depending on where you live and the type of equipment you choose.
