Fig. 11 reveals the relationships among a void fraction, energy storage density and thermal efficiency. For instance, the energy storage density tends to rise first, then drop, as the void fraction increases. There is an optimal value for the void fraction to reach the highest energy storage density at disparate air velocities.

just piping in that I've used this mod before with no issues, but recently the void and magnet completely stopped working correctly. Like you my voiding just plain doesn't work. I still auto pick up everything added to the void list no matter what. Tried a restarting, tried a new backpack, tried a new void upgrade. Doesn't matter, it just doesn't ...
