

# What are Italy's policies on energy storage

What is Italy's energy policy?

In line with the EU energy and climate policy framework, Italy's energy policy aims to decarbonise the energy supply through the expansion of renewable energy, electrification and increased energy efficiency across the economy. This is also broadly consistent with the IEA roadmap to net zero (IEA, 2021).

What is the EU state aid scheme for energy storage in Italy?

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale energy storage in Italy.

Does Italy need 9gw/71gwh of energy storage?

Italy's TSO Terna says it needs 9GW/71GWh of energy storage to integrate its renewables pipeline. Image: Terna. The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

Does Italy need an efficient energy storage system?

These targets cannot be achieved without implementing an efficient energy storage system in Italy. Italy's growing need for storage systems is particularly evident in Central and Southern Italy, where a large number of renewable energy plants have been installed.

Does Italy have an energy RDI policy?

Specifically in the energy sector, ENEA and RSE are the key public RDI institutions. Italy does not have a dedicated energy RDI policy document. Instead, several documents and strategies define its approach to energy RDI.

When will Italy's gas storage capacity be filled?

The government enacted a decree in March 2022 mandating that Italy's total gas storage capacity must be filled to at least 90% of total capacity in advance of the 2022-2023 winter period, in alignment with the IEA 10-Point Plan to Reduce the European Union's Reliance on Russian Natural Gas.

This process supports energy policy development and encourages the exchange of international best practices and experiences. Since the last review in 2016, Italy has raised its climate ambitions by aiming for carbon neutrality by 2050, and the country is on track to reach its 2030 targets for emissions reductions and energy efficiency.

In this report, the IEA provides energy policy recommendations to help Italy effectively transform its energy

# What are Italy's policies on energy storage

sector in line with its goals. Since the last review in 2016, Italy has raised its climate ...

Different mitigation policies like switching the global energy system from fossil fuels to low carbon sources, energy efficiency and conservation, reforestation and afforestation, carbon capture and storage, geoengineering, and shifts in food consumption patterns, can be adopted in an effort to accomplish such objectives.

This is the second deep dive in our four-part series that explores why battery-based energy storage is key to addressing Southern Europe's grid flexibility challenges. This article delves into the intricacies of the Italian energy market and how the current high reliance on gas-fired power generation puts the country's decarbonization targets at risk and impacts ...

The event offered a chance to discuss the IEA Italy Energy Policies Review Report ... Ms. Poletti emphasized the increasing relevance of energy storage and mentioned that the Italian government has proposed to the European Commission a scheme to develop a technology-neutral, market-based storage solution, expressing hope for a streamlined state ...

Energy Vault Holdings, a developer of sustainable grid-scale energy storage solutions, and Carbosulcis, a coal mining company owned by the Autonomous Region of Sardinia, Italy, plan to develop a 100 MW hybrid gravity energy storage system (GESS) for underground mines, pairing their modular gravity storage and batteries.

The National Energy and Climate Plan (NECP) plays a central role in achieving the European Union's climate targets and delivering Italy's contribution to the Paris Agreement. Moreover, Italy's Plan holds significant importance since, unlike many other EU Member States, the country lacks a Climate Law and thus it does not have a climate ...

Italy's appetite for energy storage seems to be growing by the month. The country is one of just a handful in Europe that includes energy storage in its national energy and climate plan, with a target of 6 GW of capacity by 2030. - This may sound like ...

The country added 60MW/106 MWh in the first half of the year. Energy storage continues to grow with the region of Lombardy and Veneto being the two largest contributors.

It is not a bold statement to say that 2024 will be the year of Renewable Energy Communities in Italy. The introduction of Renewable Energy Communities into the Italian regulatory process dates back to 'Milleproroghe' Decree 162/2019, (converted by Law No. 8/2020 of Feb. 28, 2020), which transposes the European RED II Directive (2018/2001/EU)..The ...

The review's recommendations aim to guide the country's energy transition and promote energy security. The

# What are Italy's policies on energy storage

assessment of energy policies covers climate change, energy efficiency, ...

The energy storage market in Italy doubled in capacity in the first half of the year, though Q2 saw the first slowdown in nine quarters and that could be repeated in H2, according to the country's renewable energy trade body.

New Italian regulation and tax duties. Italian Energy Storage. In order to meet the European Union's energy and climate greenhouse gas emissions targets by 2030, EU countries need to establish a 10-year integrated national energy and climate plan to cover the period between 2021 and 2030.

Country Report Italy - June 2021 2 59 257 566 inhabitants (24&#176;) - 196 in./km<sup>2</sup> (34&#176;) (dec 2020)  
Country: 2 090 G\$ (8&#176;) - pro-capita: 34 424 \$/in (27&#176;) In 2020 Italian primary energy requirement was 1.79 TWh (154 Mtoe) with a 10% of decrease in comparison with 2019 Country Specific Information Import Ren. Sources Oil Gas Solids

Italy: National Energy Strategy (NES) was published in 2013, which made a commitment to decarbonisation and reduction of imports of oil, gas and coal. ... IRENA, International Energy Storage Policy and Regulation Workshop, D&#252;sseldorf, Germany (2014) Google Scholar [53] F. Yang, X. Zhao.

According to data released last week by Italian solar energy association Italia Solare, Italy's independent energy storage installations surged in the first half of 2024, with a connected capacity of approximately 650MW, almost 10 times that of the same period in 2023.

This month we speak to Marco Petrone, CEO of Telis Energy Italy, about the role of Battery Energy Storage Systems (BESS) in fast-tracking the future of energy in Italy. Q: Marco, how are Battery ...

Italy Electricity Security Policy - Analysis and findings. An article by the International Energy Agency. Italy Electricity Security Policy - Analysis and findings. ... Storage . Italy has an increasing electricity storage capacity, mainly consisting of utility-scale pumped hydro facilities. There is also a small but growing capacity of high ...

Italy has set its objectives in the energy national plan (PNIEC) pushing to a high integration of the renewable power generation (55% of renewable share in the electric sector by 2030). In the ...

In recent years, the Italy energy policy has focused on the promotion of renewables in the country's electricity generation. In 2009, the government announced that a certain percentage of the Italian gross final energy consumption must come from renewable sources by 2020. ... 1.10 Incentive for Solar-Plus-Storage; 1.11 Net-Metering Scheme; 1. ...

Policy changes in Italy are expected to have a significant impact on the European energy storage market,

## What are Italy's policies on energy storage

potentially leading to changes in local energy storage installations in 2024. Firstly, the decline in subsidies under the Superbonus policy has resulted in reduced purchasing power among Italian residents, dampening the outlook for ...

Italy is committed to achieving carbon neutrality by 2050. Energy poverty has been a key policy issue ever since the presentation of the Clean Energy for All European package in 2016 and has gained more importance in Italian energy policy in light of the recent massive price increases for natural gas and electricity.
