To help you decide, I tested the efficiency, in a variety of scenarios, of the best portable power stations from Jackery, EcoFlow, Anker, Goal Zero, Bluetti, Dakota Lithium, Lion Energy, Vtoman, and Ugreen. What to Know Before Purchasing a Portable Power Station

What is the best portable power station for backup?

Anker Solix F1200 (1,229Wh): This unit was previously known as the PowerHouse 757 from Anker, and was also CNET's previous pick for "best portable power station for backup." Its UPS mode was one of the earlier units to boast "less than 20ms" switchover time in the event of a power outage. It's also currently \$500 off on Anker's site.

Is a portable power station a good idea?

A portable power station is going to be considerably larger and is aimed at powering more energy-hungry devices, such as a fridge, RV, or even an off-grid cabin - with heavy-duty applications for those outdoors. What are the disadvantages of a portable power station?

Are Amazon portable power stations a good choice?

Amazon Portable power stations are a great choice for campers and travelers, giving you a portable battery pack to charge any handheld devices, speakers, lights and appliances you take with you on the go. But a portable power station is even more versatile than most people realize.

How long does a portable power station last?

One cycle means using the product from fully charged to zero charge (or at least 80% in some cases). If you use your portable power station several times a week, it might only last a year or two. If you use it less frequently, it could last for much longer. What can you run on a portable power station?
